

0. Before Starting Measurement

- 1) Install the dedicated app "Smart Tacho" on your Android device.
For the installation of Smart Tacho, read out the 2D barcode at right, or search "Smart Tacho" in Google Play.
- 2) Paste Reflective Tape to Measuring Object
Cut off the reflective tape, that comes with SM-T100, into 1 to 3-cm length piece.
Peel off the craft paper on the reverse side, and paste the reflective tape to the rotating object.
- 3) Launch the app "Smart Tacho" on your Android device, and then connect SM-T100 to the Android device via OTG cable.
A message will pop up on the screen, saying "Open Smart Tacho when this USB device is connected?"
If you accept to "Use by default for this USB device" by checking the box and tapping OK, the app will automatically starts on connecting SM-T100 to your Android device from next time.

***NOTE**

SM-T100 connects to an Android device through an OTG Cable of Micro USB B-Type.
Your Android device should support USB On-The-Go (OTG) or USB host mode.
Please check by yourself if your Android device supports OTG (USB host). We do not provide support.
If your Android device requires a Micro USB C Type, please prepare a Micro USB C Type OTG cable available on the market.
A converter (Micro C Type → B Type) cannot be used.

- 4) Tap "START" on the screen of your Android device.
- 5) Make sure that the distance from SM-T100 to the reflective tape on the rotating object is between 5 cm to 30 cm, and that the incidence angle of the light is within +/- 30 degrees.

1. Display of "Smart Tacho"

Locational information On/Off

The function to obtain current location and the Internet connection should both be ON.

Tapping tone On/Off
Electronic sound can be on/off that is made when: measuring unit is switched; measurement is started/stopped; log is recorded.

Measuring value

Measuring Unit:
Switchable between RPM/RPS

Start/Stop measurement

Save log
Save the present measuring value with timestamp

VIEW LOGS

[Screen: Before Starting Measurement]

[Screen: After Starting Measurement]

On target mark:
activated when measuring value is detected

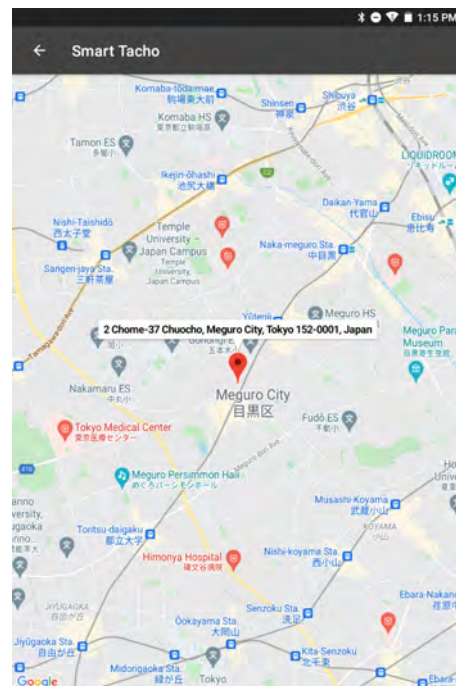

22. About the Page of VIEW LOGS

- 1) Tap "VIEW LOGS" to move the page that lists saved logs (①).
On this page, logs can be saved to a CSV file or they can be deleted.
By tapping each log, locational information can be confirmed on a map, provided it was recorded together (②).
- * RPS data that is saved on the app is rounded off to one decimal place.
- 2) By tapping "SAVE TO FILE", all the logs on the screen will be saved to a CSV file with an arbitrary name (③).
After saving the file, select whether to leave all the logs on the screen or to delete them all (④).
- * Directory to save CSV files is not selected on installing the app, therefore, a folder for saved files needs to be set.
- 3) By tapping "CLEAR ALL", all the logs on the screen will be deleted.

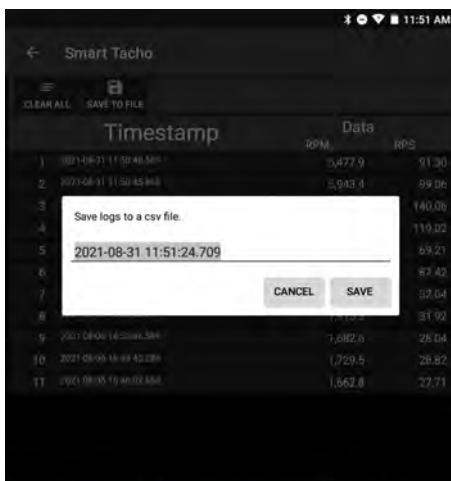

① List of Logs

	Timestamp	Data	
		RPM	RPS
1	2021-08-31 11:50:48.589	5,477.9	91.30
2	2021-08-31 11:50:45.868	5,943.4	99.06
3	2021-08-31 11:50:44.301	8,403.7	140.06
4	2021-08-31 11:50:43.040	7,141.3	119.02
5	2021-08-31 11:50:40.990	4,152.7	69.21
6	2021-08-31 11:50:39.140	5,245.1	87.42
7	2021-08-06 16:53:53.244	1,922.7	32.04
8	2021-08-06 16:53:50.379	1,915.3	31.92
9	2021-08-06 16:53:46.589	1,682.6	28.04
10	2021-08-06 16:53:42.286	1,729.5	28.82
11	2021-08-06 15:46:07.660	1,662.8	27.71

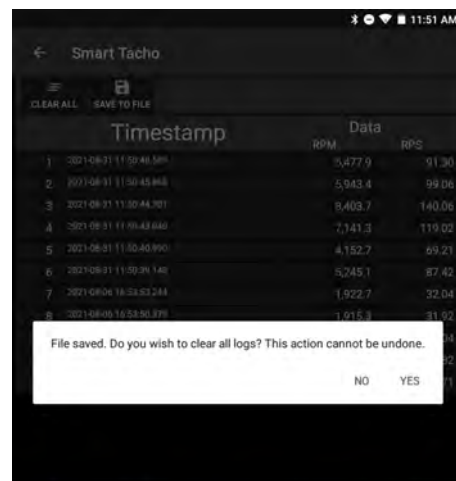

② Locational information

③ Save logs to a CSV file

④ Alert after saving a CSV file

3. About the Page of VIEW FILES

1) By tapping "VIEW FILES", move to the page that lists CSV files(①).

On this page, all the CSV files can be shared/deleted.

2) By tapping one of the file names, move to the page of individual CSV file where a list of logs that was saved in the CSV file is displayed(②).

On the page of individual file, it is possible to share/delete the file and to rename the file.

By tapping each data, locational information can be confirmed on a map, provided it was recorded together.

* RPS data that is saved on the app is rounded off to one decimal place.

3) By tapping "SHARE ALL"/"SHARE", it is possible to save the CSV file(s) in Google Drive and to attach the file(s) to G-Mail, provided the user has a linked Google account.

(③④Internet connection is required.)

4) By tapping "DELETE ALL"/"DELETE", all the files/a file will be deleted.

5) By tapping "RENAME" on the individual file page, the CSV file name can be edited.

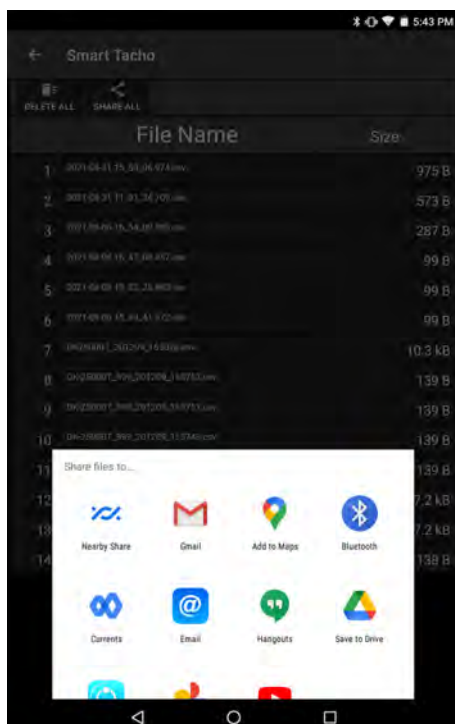

① List of CSV files

	File Name	Size
1	2021-08-31 11_51_24.709.csv	573 B
2	2021-08-06 16_54_09.989.csv	287 B
3	2021-08-06 16_47_08.457.csv	99 B
4	2021-08-06 15_52_25.883.csv	99 B
5	2021-08-06 15_49_41.972.csv	99 B

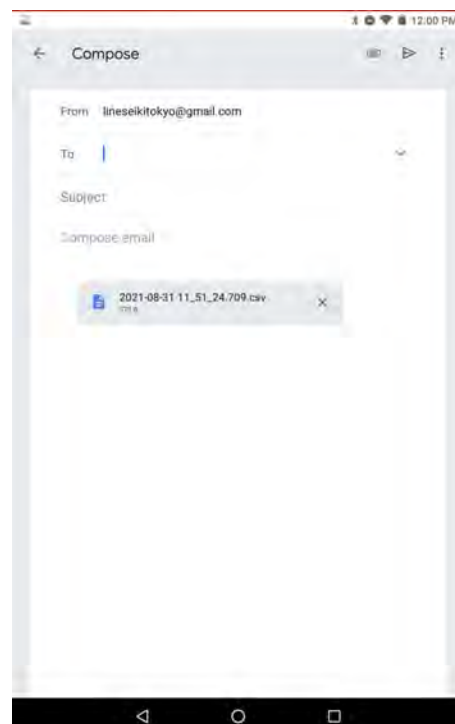

② Page of Individual CSV file

	Timestamp	RPM	RPS
1	2021-08-31 11:50:48.589	5,477.9	91.30
2	2021-08-31 11:50:45.868	5,943.4	99.06
3	2021-08-31 11:50:44.301	8,403.7	140.06
4	2021-08-31 11:50:43.040	7,141.3	119.02
